

IVCM Vanguard Conservative Index Fund

Fund Update

Quarter Ended 31 March 2018

This fund update was first made publicly available on 1 May 2018

What is the purpose of this update?

This document tells you how the IVCM Vanguard Conservative Index Fund (**Fund**) has performed and what fees were charged. The document will help you to compare the Fund with other funds. Lifetime Asset Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Fund is a portfolio, managed in Australian dollars, that is 100% invested in the Vanguard Balanced Index Fund (**Underlying Fund**) that is designed to offering broad diversification across multiple asset classes biased towards income assets (i.e. international fixed interest and cash and cash equivalents) with a target 70% allocation to income assets and a 30% allocation to growth assets (i.e. Australasian and International equities).

The Underlying Fund is a fund of funds and seeks to achieve its investment objective by investing primarily through passive, index-tracking investment funds managed by the underlying investment manager or associated investment managers that themselves seek investment returns corresponding to their own respective underlying indexes.

Total value of the fund	AUD \$1,085,715
Number of investors	6
Date fund started	1 August 2017

What are the risks of investing?

Risk indicator for the IVCM Vanguard Conservative Index Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. As the Fund has not been in existence for five years, the risk indicator is based on five-year information including actual performance figures from 1 August 2017, and market returns data for the period prior to that date. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this Fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	7.23%

The market index annual return is a composite index, calculated using the S&P Target Risk Moderate Index (in Australian dollars). See the Statement of Investment Policy and Objectives (**SIPO**) for details of the Fund's benchmark asset allocation and the asset class indices.

Additional information about the market index is available in the 'Market Index' document on the Disclose Register companiesoffice.govt.nz/disclose (search for 'IVCM (NZ) PIE Superannuation Fund').

What fees are investors charged?

Investors in the Fund are charged fund charges. Based on the PDS dated 1 August 2017 these are expected to be:

	% of net asset value
Total fund charges	1.23%
Which are made up of:	
Total management and administration charges	1.23%
<i>Including:</i>	
• Manager's basic fee	0.90%
• Other management and administration charges	0.33%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor
	AUD \$0.00

All fees are GST excluded (if applicable) and there are no performance fees charged by the Fund.

Investors may also be charged individual action fees for specific actions or decisions (for example, withdrawal fees). See the PDS for more information about these fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor¹

Ben had AUD \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Ben received a return after fund charges were deducted of AUD \$723 (that is 7.23% of his initial AUD \$10,000). Ben also paid £0.00 in other charges. This gives Ben a total return after tax of AUD \$723 for the period.
