

IVCM Emirates Active Fund – Class C

Fund Update

Quarter Ended 31 December 2018

This fund update was first made publicly available on 24 January 2019

What is the purpose of this update?

This document tells you how the IVCM Emirates Active Fund – Class C (**Fund**) has performed and what fees were charged. The document will help you to compare the Fund with other funds. Lifetime Asset Management Limited (**Lifetime**) prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this Fund

The Fund is a portfolio, managed in pounds sterling, with 80% allocated to growth assets and 20% allocated to income assets. The Fund is 100% invested in the underlying fund. The underlying fund is a feeder fund to the Emirates National Bank of Dubai (**NBD**) Société d'investissement à Capital Variable (**SICAV**) – Emirates Active Managed Fund, a sub-fund of the Luxembourg domiciled Emirates NBD SICAV. The investment objective is to outperform the MSCI ACWI Index net div (LCT) before fees and taxes.

Total value of the Fund	£4,188,001
Number of investors in the Fund	33
The date the Fund started	1 December 2016

What are the risks of investing?

Risk indicator for the IVCM Emirates Active Fund – Class C

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. As the Fund has not been in existence for five years, the risk indicator is based on the market index data for the period 1 January 2014 to 30 November 2016 and actual returns for the period 1 December 2016 to 31 December 2018. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this Fund.

How has the Fund performed?

	Past year
Annual return (after deductions for charges and tax)	-12.09%
Annual return (after deductions for charges but before tax)	-11.76%
Market index annual return (reflects no deduction for charges and tax)	-9.58%

The market index annual return is based on the MSCI ACWI Index net div (LCT). To the extent that imputation credits are available, they are included in the market index.

The market index changed on 21 December 2018 from the Morningstar Aggressive Target Risk USD (hedged to pound sterling) to the MSCI ACWI Index net div (LCT) as it is more appropriate index in terms of assessing movements in the market in relation to the returns from the assets in which the Fund invests.

See the Statement of Investment Policy and Objectives (**SIPO**) for further details of the Fund's benchmark asset allocation and the asset class indices.

Additional information about the market index is available in the 'Market Index' document on the offer register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Scheme').

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the average annual return since the Fund started, up to 31 December 2018.

Important: This does not tell you how the Fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (**PIR**) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Fund are charged fund charges. Based on the PDS dated 21 December 2018 these are expected to be:

	% of net asset value
Total fund charges	2.69%
Which are made up of:	
Total management and administration charges	2.69%
<i>Including:</i>	
• Manager's basic fee	0.69%
• Other management and administration charges	2.00%
Total performance-based fees*	0.00%
Other charges	Dollar amount per investor
	£0.00

* There are no performance fees charged by the Fund.

All fees include GST (if applicable).

Investors may also be charged individual action fees for specific actions or decisions (for example, withdrawal fees). See the PDS for more information about these fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Ben had £10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Ben received a return after fund charges were deducted of -£1,176 (that is -11.76% of his initial £10,000). Ben also paid £0.00 in other charges. This gives Ben a total loss after tax of -£1,209 for the period.
