

STATEMENT OF INVESTMENT POLICY AND OBJECTIVES

IVCM (NZ) PIE Superannuation Fund

3 July 2020

Issued by Ranfurly Strategic Limited

This Statement of Investment Policy and Objectives (SIPO) sets out the investment policy and objectives of IVCM (NZ) PIE Superannuation Fund (Scheme) and the investment funds offered through the Scheme. The SIPO should be read in conjunction with the Product Disclosure Statement for the Scheme, which is available on the Scheme's offer register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Fund').

Interests in the Scheme are issued by the Manager of the Scheme, Ranfurly Strategic Limited.

The Scheme is governed by the Trust Deed and the Financial Markets Conduct Act 2013 (FMCA) (amongst other laws).

The provisions in the Trust Deed and the FMCA prevail over anything to the contrary in any other document.

The provisions of the Trust Deed and the FMCA may change in the future.

Some terms used in this document are defined in the Trust Deed or the FMCA.

1

Description of the Scheme

The IVCM (NZ) PIE Superannuation Fund (Scheme) is a registered superannuation scheme under the Financial Markets Conduct Act 2013 (FMCA).

The Scheme is a 'defined contribution' scheme, which means that the benefits payable depend on contributions paid, returns on those contributions, and tax and fees deducted.

The manager of the Scheme is Ranfurly Strategic Limited. The Manager has appointed Adminis NZ Limited as administration manager of the Scheme. The supervisor is Public Trust.

The Scheme offers pooled investments for the purpose of helping members save for their retirement and gives them access to a range of investments they may otherwise not be able to access as an individual. The investments are represented by units, in the member's choice of investment funds (Fund or Funds).

These include three open and two closed diversified funds.

The diversified funds range from funds that invest in a greater proportion of lower-risk investments, such as cash and cash equivalents and fixed interest, to funds that invest in a greater proportion of higher risk investments, such as equities and property.

The Scheme comprises separate Funds as detailed below. However, the assets of the Funds in the Scheme comprise a single trust fund.

As at the date of this SIPO, the Funds available to members of the Scheme are:

Funds	Fund Type	Open (✓) / Closed (✗)
IVCM Emirates Active Fund – Class C	Diversified	✗
IVCM Emirates Balanced Fund – Class C	Diversified	✗
IVCM Vanguard LifeStrategy 40% Equity Fund	Diversified	✓
IVCM Vanguard LifeStrategy 60% Equity Fund	Diversified	✓
IVCM Vanguard Conservative Index Fund	Diversified	✓

The value of a member's interest in the assets of the Scheme is determined by multiplying the units attributable to the accounts held by the member by the relevant unit price(s) of the Fund(s) they are invested in. No member acquires an interest in any particular asset of the Scheme to which their units in any particular Fund relate.

The Manager may close, wind up, or alter any Funds at any time in accordance with the Trust Deed.

This SIPO, the Product Disclosure Statement (PDS), the Other Material Information document and other documentation relating to the Scheme can be found in the Disclose Register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Fund').

2

Investment Philosophy

The Scheme's investment philosophy is to provide members with a range of investment choices and investment management styles and greater access to investments they may otherwise not be able to access as an individual, to enable them to tailor a portfolio that suits their unique goals and retirement needs.

The Manager does this by investing the Funds within the Scheme into a range of underlying investment funds (Underlying Funds) – generally through the use of passively managed Underlying Funds (i.e. designed to track the investments returns on specific indices) – to provide a broad selection of funds for members to choose from.

The Manager's investment approach is to utilise various Underlying Funds with a variety of investment philosophies, styles, and asset allocation. The investment philosophies and styles of the Underlying Fund Managers are taken into consideration when determining whether to choose an Underlying Fund.

The Manager offers diversified funds that provide exposure to a range of asset classes with varying ranges of benchmark asset allocations and ranges to provide differing balances of risk and return.

The Manager periodically, but at least once a year, reviews the Funds offered, and the Underlying Funds to ensure they continue to provide a suitable diversity of choice for members to enable them to tailor a retirement portfolio that suits their unique goals and retirement needs. The main factor for determining the Funds and the Underlying Funds is demand from members and prospective Scheme members.

The Funds do not have a separate investment manager. The Manager makes decisions for the Scheme in its role as manager by selecting the Underlying Funds, but the investment management services for the Underlying Funds are performed by each of those underlying funds' investment managers (Underlying Fund Managers) and not by the Manager.

The Manager determines the investment strategy and objectives of each Fund and sets the benchmark asset allocations and ranges (where applicable) that reflects that strategy and objectives (as set out in the Schedules). The Manager then selects one or more Underlying Funds (generally passively managed) that provide the exposure required for the Funds. Where the investment strategy and objectives (including benchmark asset allocations and ranges) of an Underlying Fund cease to provide the required exposure, the Manager will determine whether to vary the investment strategy and objectives adopted in respect of the affected Fund or to change the Underlying Fund to maintain the existing investment strategy and objectives adopted in respect of the affected Fund. Members will be notified in advance as provided by the Scheme's Trust Deed.

Each of the Funds in the Scheme invest into a single Underlying Fund (i.e. a one-to-one relationship). The Underlying Funds at the date of this SIPO are set out below.

Fund	Underlying Fund	Fund Type	Investment Style
IVCM Emirates Active Fund – Class C ¹	Emirates Active Managed Fund - Class C	Diversified	Active
IVCM Emirates Balanced Fund – Class C ¹	Emirates Balanced Managed Fund - Class C	Diversified	Active
IVCM Vanguard LifeStrategy 40% Equity Fund	Vanguard LifeStrategy 40% Equity Fund – Income (GBP)	Diversified	Passive
IVCM Vanguard LifeStrategy 60% Equity Fund	Vanguard LifeStrategy 60% Equity Fund – Income (GBP)	Diversified	Passive
IVCM Vanguard Conservative Index Fund	Vanguard Conservative Index Fund	Diversified	Passive

See Section 9: Schedules for the asset allocation, market indexes and other details of the Funds.

¹ The Fund is closed to new investments.

3

Investment Objective

The investment objective of the Scheme is to provide members with a range of funds that individually or in combination will enable members to meet their retirement investment objectives in a manner that is consistent with their own unique individual risk/return profiles.

The Manager aims to achieve this through the individual investment strategies and objectives for each Fund. These are detailed in the relevant Schedules.

4

Investment Policies

Currency Hedging Policy

Currency hedging involves off-setting the currency exposure of foreign assets, such as international fixed interest or international equities, to reduce the effect of currency movements on the value of those assets.

All the Funds (and all their Underlying Funds) are denominated in currencies other than New Zealand dollars. Some of the Underlying Funds (as set out in the relevant Schedule) are hedged to the base or other currency of the Underlying Fund. However, none of the Funds undertake any currency hedging at the Fund level. Therefore, movements in currency exchange rates will affect the return of the Funds.

Liquidity and Cash Management Policy

The Scheme bank account is monitored weekly. The Manager monitors each Fund's liquidity levels in order to meet obligations during normal market conditions. This includes having available funds to meet withdrawals, taxation payments, fees and expenses.

Derivatives Policy

Financial instruments known as 'derivatives' may be used in some of the Underlying Funds for the purposes of risk management, performance enhancement or to optimise investment strategy implementation (i.e. as an alternative to investing in a physical asset).

If an Underlying Fund contains derivatives (as set out in the relevant Schedule) this is implemented within the Underlying Funds and not directly within the Funds.

Taxation Policy

The Scheme is a Portfolio Investment Entity (PIE). Tax on investment income is calculated at each member's prescribed investor rate (currently either 0%, 10.5%, 17.5% or 28% depending on each member's circumstances) and paid to the Inland Revenue on members' behalf annually.

More information relating to taxation can be found in the 'Other Material Information' document on the Disclose Register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Fund').

Rebalancing Policy

The Manager achieves the Funds' benchmark asset allocations and ranges by selecting Underlying Funds that align to the benchmark asset allocations and ranges adopted by the Manager. The Funds do not undertake rebalancing, but they may invest into (but will not be restricted to) Underlying Funds that undertake regular rebalancing to ensure that the actual asset allocations of the Underlying Funds remain appropriate.

The benchmark asset allocations and ranges (where applicable) for each Fund is detailed in the relevant Schedules.

Pricing / Valuation Policies

The Manager has outsourced the registry administration, pricing, and valuation of the Scheme to the Administration Manager. The Administration Manager is provided with unit prices (or information to calculate a unit price) each week in accordance with their pricing methodology.

The valuation of assets is generally based on information provided to the Administration Manager by independent third-party providers. Where practicable the Administration Manager will verify this data by comparing information from a second independent source.

Risk Management Policy

Scheme assets are exposed to different risks that will lead to variations in investment returns. Members bear these investment risks as variations in investment performance which directly impact the value of their investments in the Funds. To reduce the negative impacts of such risks the Manager offers a range of Funds with different investment management styles and asset classes to enable members to tailor a portfolio that suits their unique goals and retirement needs.

Socially Responsible or Ethical Investment

Responsible investment, including environmental, social, and governance considerations, are not taken into account in the investment policies and procedures of the Scheme.

Related Parties Transactions

The Manager conducts all transactions with related parties of the Scheme in accordance with the rules on related-party transactions that apply to managed investment schemes under the FMCA. The general rule under the FMCA is that the manager (and any administration manager, or other person to whom the manager has contracted some or all of its manager functions) of a scheme is prohibited from entering into a transaction that provides for a related party benefit to be given.

Conflicts of Interest Policy

Conflicts of interest can arise when the interest of the Manager's employees, customers or entities are inconsistent with, or diverge from, some or all of the interests in the Scheme. The Manager's key principle is that any potential conflicts of interest are clearly disclosed by any person making decisions on behalf of Scheme members.

More information relating to conflicts of interest can be found in the 'Conflicts of Interest' document on the Disclose Register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Fund').

5

Limit Break Reporting

Each of the Scheme's Funds invest into one Underlying Fund that is a diversified fund, but may hold cash to meet withdrawals, taxation payments, fees and expenses. As the Funds are designed to track the performance of a single Underlying Fund there is low probability of a limit break occurring.

However, we have set appropriate maximum permitted range limits for exposure to underlying asset classes and monitor them on a monthly basis to ensure that maximum permitted range limits are not breached. The maximum permitted range limits have been designed based on the maximum permitted ranges of the Underlying Funds.

In cases where these maximum permitted range limits are breached, the Manager will take action to determine the reason the maximum permitted range limits were breached and take action, including, but not limited to, changing the maximum permitted ranges in the SIPO (i.e. as the Manager has no control over the Underlying Funds).

For the purposes of the SIPO a 'limit break' is any breach of any limits on either the nature or type of investments that may be made by the Fund or the maximum permitted range, being the proportion of each type of assets that may be invested in, as set out in this SIPO.

In determining whether a limit break is material, the following factors will be considered:

- the size of the breach, in relation to the Fund;
- any losses to members;
- whether the breach involves related party transactions;
- whether the breach is an isolated incident, or part of a recurring pattern of breaches;
- if the breach causes the PDS, registry entry, or an advertisement to which the offer relates, to be false or misleading;
- how quickly the breach is rectified after the manager becomes aware of the breach;
- how long the breach lasted.

6

Investment Performance Monitoring and Reporting

The investment performance of each Fund is monitored monthly by the Manager.

Performance of the Funds is monitored over various periods (gross of tax and fees) at least quarterly.

Performance is measured relative to each Fund's benchmark indices.

For the avoidance of doubt, just because a Fund has underperformed against its benchmark (gross of tax and fees) does not mean the Manager will make changes to the Fund.

7

Investment Strategy Review

▼

The Manager oversees the development and implementation of the investment strategy of the Funds within the Scheme, including adding and removing Underlying Funds.

As the Scheme's investment philosophy is to provide members with a range of Funds to enable them to tailor a portfolio that suits their unique goals and retirement needs, the Manager's investment strategy review is primarily focused on whether the Funds offered to members provide a diversified range of asset classes rather than whether an Underlying Fund is performing, underperforming or its ranking compared to peers.

The Manager has evaluated all the Underlying Funds based on analysis undertaken by Morningstar (or an alternative research provider) so that there is publicly available independent analyst-driven research to assist members in choosing a Fund and its potential role in their tailored portfolio that suits their unique goals and retirement needs.

The investment strategy review is performed as part of the Manager's regular monthly and quarterly reporting obligations.

8

SIPO Compliance and Review

The Manager monitors compliance with the SIPO on a monthly basis and a monthly report is prepared and provided to the Supervisor.

A formal review of the SIPO is triggered where there is a material change to any of the Funds including (but not limited to):

- the nature or type of investments that may be made;
- the benchmark and asset ranges of the Funds;
- a change to any of the investment policies of the Funds.

Any changes to the SIPO are approved by the Manager's Board, and are subject to the restrictions (if any) contained in the Trust Deed.

The Manager will give the Supervisor prior notice of any changes in accordance with the Trust Deed and FMCA.

The Scheme's latest SIPO is available on the Disclose Register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Fund').

9

Schedules

SCHEDULE 1 IVCM EMIRATES ACTIVE FUND - CLASS C

Fund Currency

Pounds Sterling GBP

Establishment Date

1 December 2016

Description, Investment Objective, and Currency Hedging

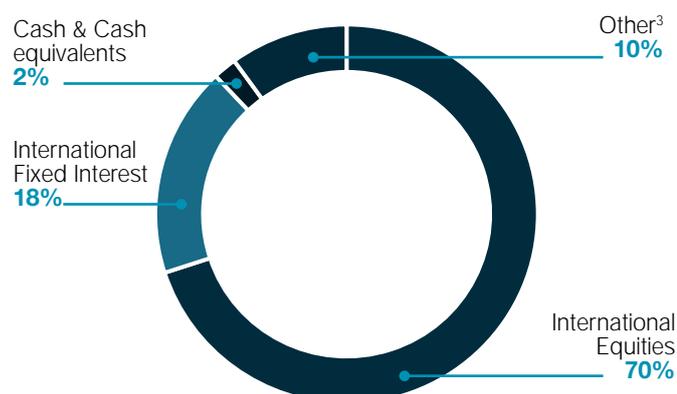

Description: The Underlying Fund is a feeder fund to the Emirates National Bank of Dubai (NBD) Société d'investissement à Capital Variable (SICAV) – Emirates Active Managed Fund, a sub-fund of the Luxembourg domiciled Emirates NBD SICAV. The investment objective is to invest globally through diversified investment funds in a range of asset categories, including cash and cash equivalents, international fixed income, international equity and other assets (i.e. derivatives and alternative investments), with the aim of providing long term capital growth. It will seek to reduce the volatility traditionally associated with investments in markets through broad asset categories and investment manager diversification.

The Fund is 100% invested in the Underlying Fund but may hold cash to meet withdrawals, taxation payments, fees and expenses.

Objective: To outperform the MSCI ACWI Index net div (LCT) before fees and taxes.

Currency hedging: The base currency of the Underlying Fund is United States dollars and is 100% hedged to pound sterling by the Underlying Fund Manager. No currency hedging is performed at the Fund level and the Fund is not hedged to New Zealand dollars. Movements in currency exchange rates will affect the return of the Fund.

Benchmark Asset Allocation

Assets Category	Operating Range	Maximum Permitted Range
International Equities	50% - 85%	45% - 90%
Other ³	0% - 20%	0% - 40%
International Fixed Interest	0% - 100%	0% - 100%
Cash & Cash Equivalents	0% - 100%	0% - 100%

² As the Fund has not been in existence for five years, the risk indicator is based on actual investment returns from 1 August 2017 to 31 March 2020 and market returns data from 1 April 2015 to 31 July 2017. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund. You can see the most recent risk indicator in the latest fund update for the Fund available at disclose-register.companiesoffice.govt.nz/

³ The 'other' asset category relates to derivatives, future contracts and alternative investments (i.e. commodities, hedge funds, private equity (generally with low liquidity) and may include property).

SCHEDULE 2 IVCM EMIRATES BALANCED FUND - CLASS C

Fund Currency

Pounds Sterling GBP

Establishment Date

1 December 2016

Description, Investment Objective, and Currency Hedging

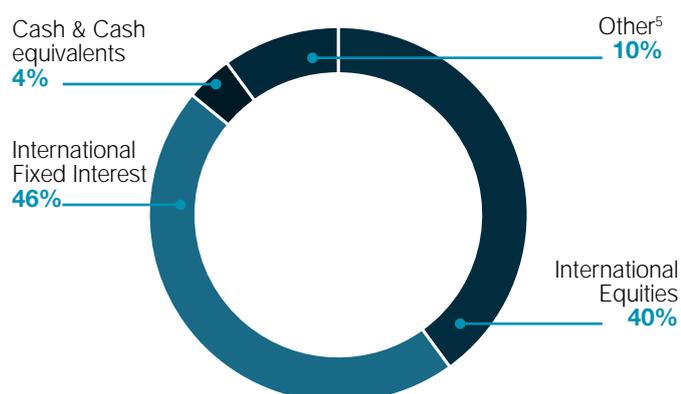

Description: The Underlying Fund is a feeder fund to the Emirates NBD SICAV – Emirates Balanced Managed Fund, a sub-fund of the Luxembourg domiciled Emirates NBD SICAV. The investment objective is to invest globally through diversified investment funds in a range of asset categories, including cash and cash equivalents, international fixed income, international equity and other assets (i.e. derivatives and alternative investments), with the aim of providing long term capital growth through a balanced investment strategy. It will seek to reduce the volatility traditionally associated with investments in markets through broad asset categories and investment manager diversification.

The fund is 100% invested in the underlying fund but may hold cash to meet withdrawals, taxation payments, fees and expenses.

Objective: To outperform the Bloomberg Barclays Global Aggregate Index (NZD hedged) before fees and taxes.

Currency hedging: The base currency of the underlying fund is United States dollars and is 100% hedged to pound sterling by the Underlying Fund Manager. No currency hedging is performed at the fund level and the fund is not hedged to New Zealand dollars. Movements in currency exchange rates will affect the return of the fund.

Benchmark Asset Allocation
