

How has the Fund performed?¹

	Average over past 5 years	Past year
Annual return² (after deductions for charges and tax)	-3.03%	0.20%
Annual return (after deductions for charges but before tax)	-1.98%	1.58%
Market index annual return (reflects no deduction for charges and tax)	9.46%	11.89%

The market index annual return is based on the MSCI ACWI Index net div (LCT). To the extent that imputation credits are available, they are included in the market index.

The market index changed on 21 December 2018 from the Morningstar Aggressive Target Risk USD (hedged to pound sterling) to the MSCI ACWI Index net div (LCT) as it is more appropriate index in terms of assessing movements in the market in relation to the returns from the assets in which the Fund invests.

See the Statement of Investment Policy and Objectives (**SIPO**) for further details of the Fund's benchmark asset allocation and the asset class indices.

Additional information about the market index is available in the 'Market Index' document on the offer register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Scheme').

Returns in this update are after tax at the highest prescribed investor rate (**PIR**) of tax for an individual New Zealand resident. Your tax may be lower.
