## What are the risks of investing?

*Risk indicator for the IVCM Vanguard LifeStrategy 80% Equity Fund[1]*

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at **sorted.org.nz/tools/investor-kickstarter**

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. As the Fund has not been in existence for five years, the risk indicator is based on market index data for the period 1 July 2021 to 30 September 2023 and actual returns for the period 1 October 2023 to 30 June 2026. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this Fund.

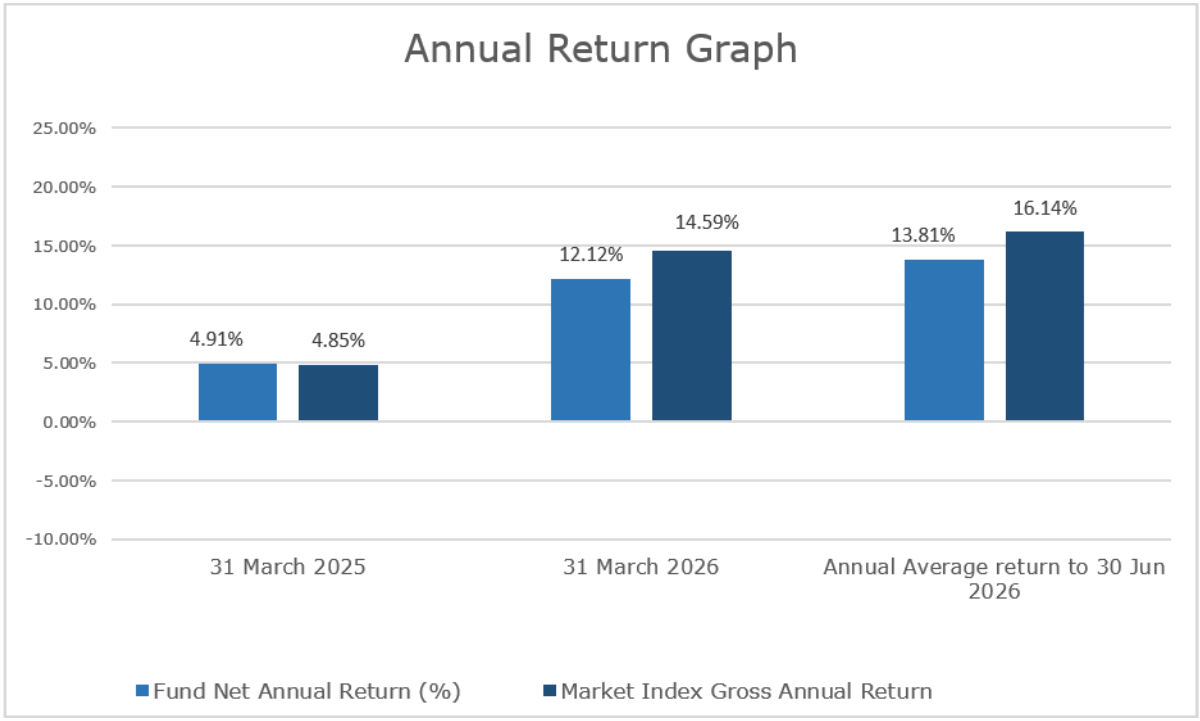
## How has the Fund performed?

| | Past year[2] |
|---|---|
| **Annual return[2]** (after deductions for charges and tax) | 20.91% |
| **Annual return** (after deductions for charges but before tax) | 22.60% |
| Market index annual return (reflects no deduction for charges and tax) | 22.47% |

The composite index return is the strategic asset allocation-weighted aggregate performance of relevant market and peer group indices.

See the Statement of Investment Policy and Objectives (**SIPO**) for details of the Fund's benchmark asset allocation and the asset class indices.

Additional information about the market index is available in the 'Market Index' document on the Offer Register at **disclose-register.companiesoffice.govt.nz** (search for 'IVCM (NZ) PIE Superannuation Fund').



This shows the return after fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the average annual return since the Fund started, up to 30 June 2026.

**Important**: This does not tell you how the Fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (**PIR**) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

## Notes

1. This fund came into existence on 14 September 2023 and received its first investment on 20 September 2023. To calculate the risk indicator over a 5-year period, market index return data has been used for the period up to 30 September 2023 and actual returns for the period 1 October 2023 to 30 June 2026. Using market index return data may make the risk indicator a less reliable indicator of how much fund values are likely to go up and down in future.

2. Hive Funds (formerly MB Funds - the Manager) has used weekly unit prices to calculate the fund performance for the IVCM Vanguard LifeStrategy 80% Equity Fund.

3. Including GST. The Annual Fund Charges are based on an estimate. More information about the estimated Annual Fund Charges is available on the IVCM (NZ) PIE Superannuation Fund's Offer Register at www.companiesoffice.govt.nz/disclose.

4. The fee estimates are based on our best estimate of charges incurred. We have included all known and expected expenses of the fund in the estimate of Annual Fund Charges. Included in the Annual Fund Charges is an estimate of fees charged monthly by the underlying investment managers to their funds. More information about the estimated Annual Fund Charges is available on the IVCM (NZ) PIE Superannuation Fund's Offer Register at www.companiesoffice.govt.nz/disclose.
